PROFESSIONAL SUMMARY

Full-Stack Developer and Product Builder focused on privacy-first tools, bilingual web products, automation workflows, and practical AI-assisted internal systems. Background combines technical support, digital marketing, and self-directed software development to build useful, maintainable systems around real workflows.

CORE SKILLS

Frontend: TypeScript, React, Vite, Tailwind CSS, Three.js, Next.js, RTL/LTR interfaces

Backend/Infra: Python, FastAPI-style APIs, PostgreSQL, Redis, Docker, GitHub Actions, Vercel

Automation/AI: Workflow automation, AI-assisted workflows, MCP-style tooling, memory and knowledge-routing patterns

Product/Ops: Product thinking, technical documentation, SEO, email marketing, analytics, technical support

SELECTED WORK

QuickShed v0.7.0 | *Privacy-first browser utility product*

- Built around client-side processing, bilingual Arabic/English usage, and practical text/data workflows.
- Current work is moving toward a newer v0.7.0 release, so fixed tool-count claims are intentionally avoided.

Technologies: Next.js, TypeScript, Tailwind CSS, PWA, Browser APIs | *Live:* quickshed.vercel.app | *GitHub:* github.com/Habib1001-m/quickshed

Mohamed Habib Portfolio | *Bilingual personal portfolio*

- Built with React, TypeScript, Vite, Tailwind CSS, Three.js, GitHub Actions, and Vercel.
- Improved through audit-driven sprints covering mobile navigation, language persistence, metadata, and project links.

Technologies: React, TypeScript, Vite, Tailwind CSS, Three.js, Vercel | *mohamed-habib-portfolio-opal.vercel.app*

SIEVE Research OS | *Evidence-based decision workflow*

- Designed to organize screening, evaluation, and governance around complex decisions using structured evidence and decision gates.

Note: Present with screenshots/demo evidence before using as a primary public project.

EXPERIENCE

Product Builder & Independent Developer | *Self-Employed, Cairo* | 2022 - Present

- Built bilingual web products and internal systems across privacy-first tooling, automation, AI-assisted workflows, and research systems.
- Worked with TypeScript/React/Vite/Tailwind, Python/FastAPI-style patterns, Redis/PostgreSQL patterns, Docker, GitHub, and Vercel.

Digital Marketing Specialist | *Freelance, Egypt* | Nov 2020 - Present

- Worked across content strategy, SEO/SMO, email marketing, analytics, and campaign execution; applied user-behavior insight to product work.

Senior Technical Support Specialist | *Orange, Egypt* | Jan 2016 - Jan 2020

- Troubleshoot network, hardware, software, and access issues; provided remote support and user-facing technical assistance.
